

## Deliverable 3 — Jira Evidence (Screenshots)

Campus Placement & Internship Pipeline • Jira project CPIP

| Name               | SRN           | Course                       | Jira Project |
|--------------------|---------------|------------------------------|--------------|
| Prajwal G Devadiga | PES1UG24CS590 | Software Engineering - Lab 2 | CPIP         |

Paste each screenshot below its heading, then export this file to PDF. These must be captured from your own Jira workspace — the instructor also reviews the live board.

### Screenshot 1 — Backlog — the Epic and all six User Stories

Where to capture: CAPTURE AFTER step 5 (points set) and BEFORE you drag anything into Sprint 1. Backlog view, Epic panel open (press E), all 6 stories visible under EPIC-1. Once a sprint starts, the Backlog section empties and this shot is gone.

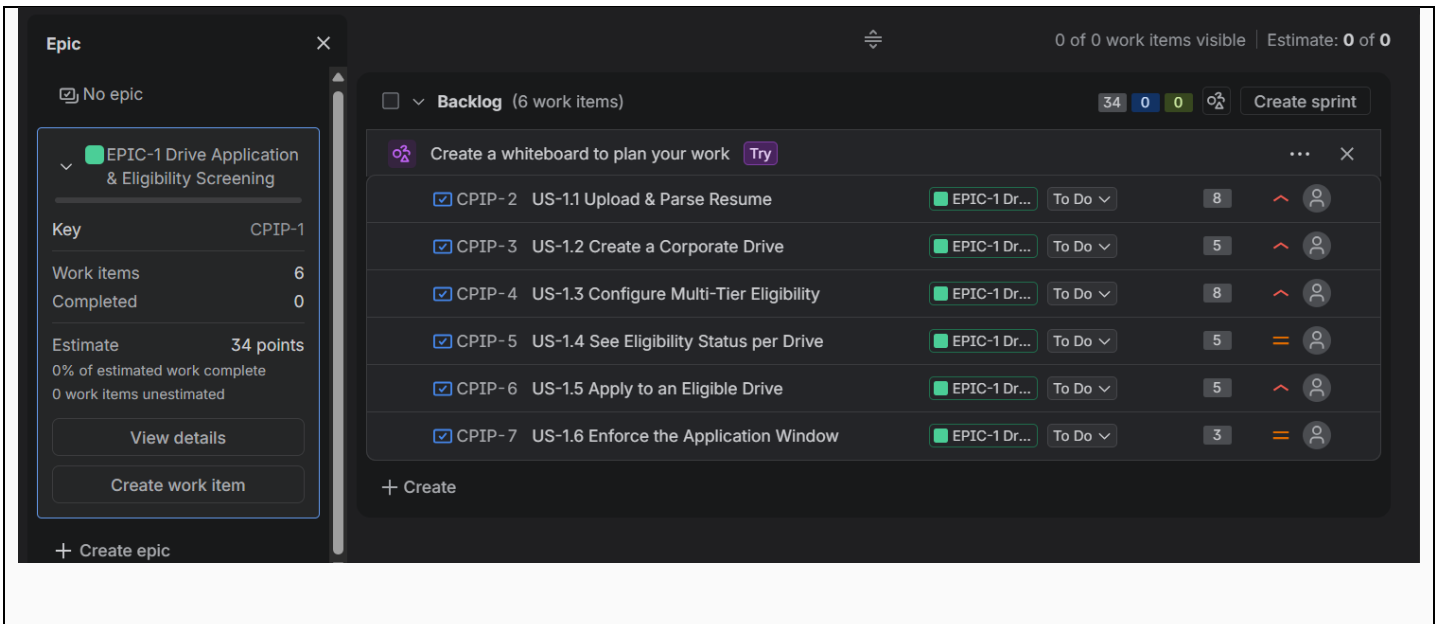

The screenshot shows the Jira interface for the 'Campus Placement & Internship Pipeline' project. The 'CPIP board' is selected, and the 'Backlog' view is active. The 'Epic' panel is open, displaying the details for 'EPIC-1 Drive Application & Eligibility Screening'. The epic has a key of 'CPIP-1', 6 work items, and a total estimate of 34 points. The 'Backlog' list shows 6 user stories under this epic, each with a status of 'To Do' and a point value.

| Item | Key                                     | Status | Points |
|------|-----------------------------------------|--------|--------|
| 1    | US-1.1 Upload & Parse Resume            | To Do  | 8      |
| 2    | US-1.2 Create a Corporate Drive         | To Do  | 5      |
| 3    | US-1.3 Configure Multi-Tier Eligibility | To Do  | 8      |
| 4    | US-1.4 See Eligibility Status per Drive | To Do  | 5      |
| 5    | US-1.5 Apply to an Eligible Drive       | To Do  | 5      |
| 6    | US-1.6 Enforce the Application Window   | To Do  | 3      |

### Screenshot 2 — Story point assignments

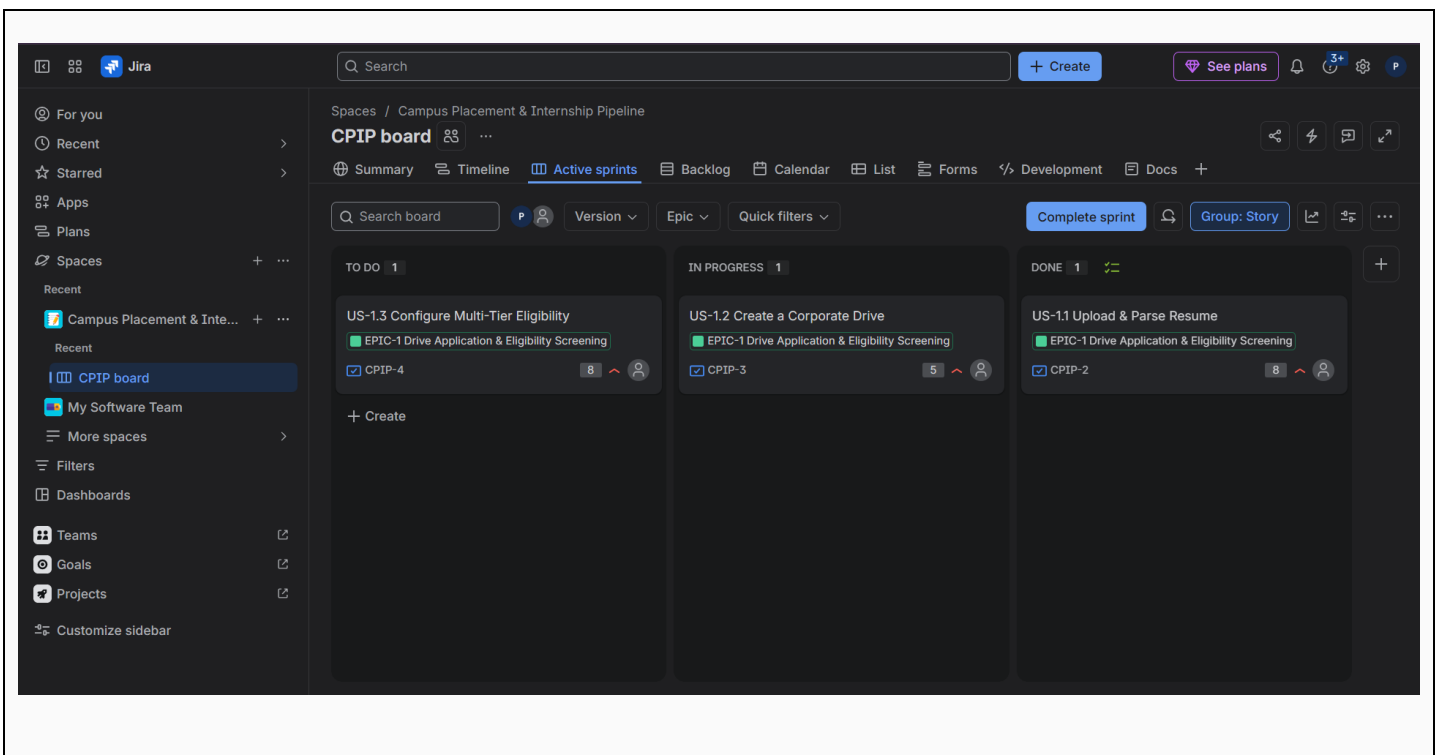

Where to capture: CAPTURE AT THE SAME MOMENT as Screenshot 1, but make it a different view: click EPIC-1 in the Epic panel so its total (34 pts) shows, with the per-story point badges down the right-hand edge.

[ paste screenshot 4 here ]

### Screenshot 3 — Sprint board — Active Sprint view

Where to capture: CAPTURE MID-SPRINT, while the three Sprint 1 cards are SPREAD across To Do / In Progress / Done — not all in one column. Do it BEFORE clicking Complete sprint, which empties the board permanently.

### Screenshot 4 — Burndown Chart

Where to capture: CAPTURE AFTER the sprint's cards have been moved to Done. Reports > Burndown Chart, pick the sprint, and set Estimation statistic to STORY POINTS (it defaults to Issue Count). Still available after the sprint is completed.

## Burndown Chart
