

Deliverable 3 — Jira Evidence (Screenshots)

Customizable Subscription Box Scheduler • Problem Statement #35 | Retail, E-Commerce & Finance • Jira project SBOX

Name	SRN	Course	Jira Project
Prajwal G Devadiga	PES1UG24CS590	Software Engineering - Lab 2	SBOX

Paste each screenshot into the box below its heading, then export this file to PDF. Every shot must come from your own Jira workspace.

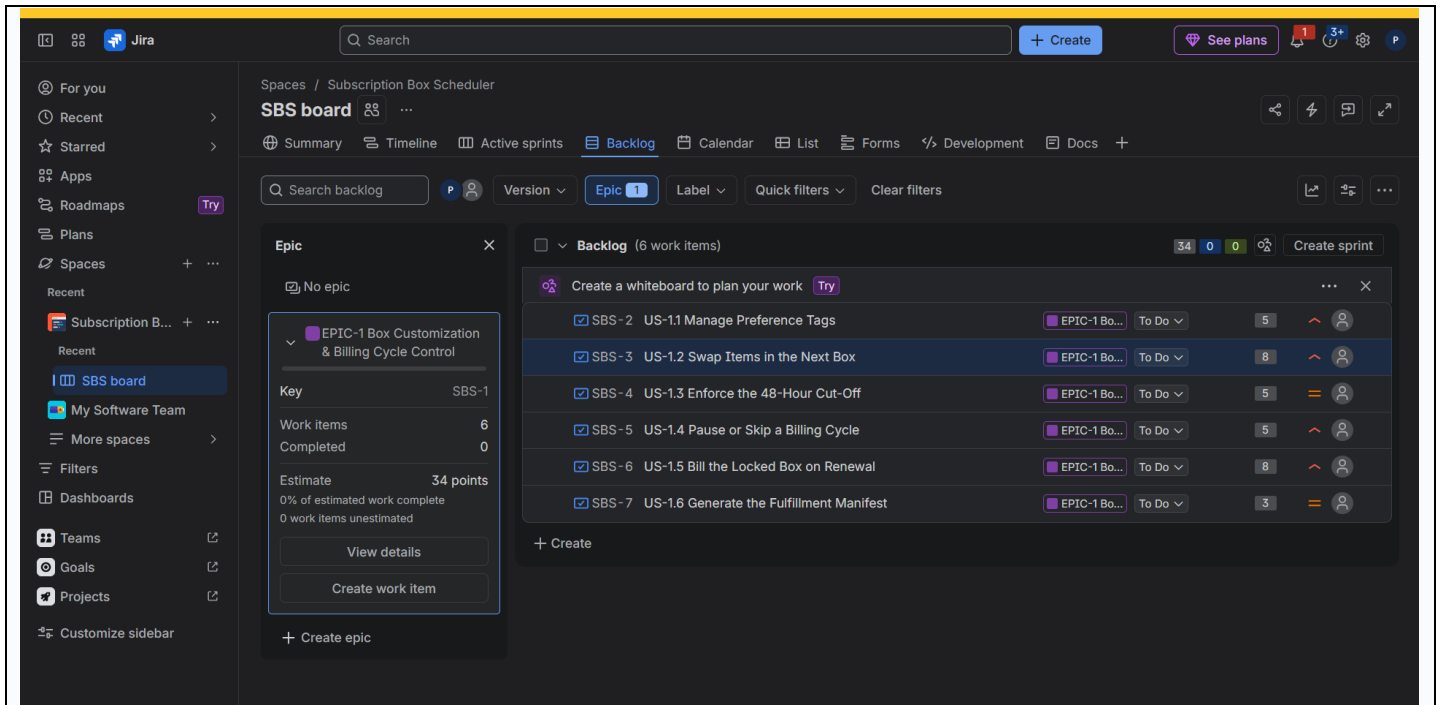

Screenshot 1 — Jira backlog - the Epic and all six User Stories

When to capture: Capture AFTER story points are set and BEFORE dragging anything into Sprint 1. Backlog view, Epic panel open (press E), all 6 stories under EPIC-1. Starting a sprint empties the Backlog section and this view is lost.

The screenshot displays the Jira interface for the 'SBS board'. The left sidebar contains navigation links: 'For you', 'Recent', 'Starred', 'Apps', 'Roadmaps', 'Plans', 'Spaces', 'Recent', 'Subscription B...', 'SBS board', 'My Software Team', 'More spaces', 'Filters', 'Dashboards', 'Teams', 'Goals', 'Projects', and 'Customize sidebar'. The main content area shows the 'SBS board' with a search bar and filters. The 'Epic' panel is open, showing 'EPIC-1 Box Customization & Billing Cycle Control' with 6 work items and 0 points. The main backlog area shows 6 user stories (SBS-2 to SBS-7) all assigned to 'EPIC-1 Bo...'. The interface includes a top bar with 'Jira' and a search bar, and a bottom bar with 'Create' and 'See plans' buttons.

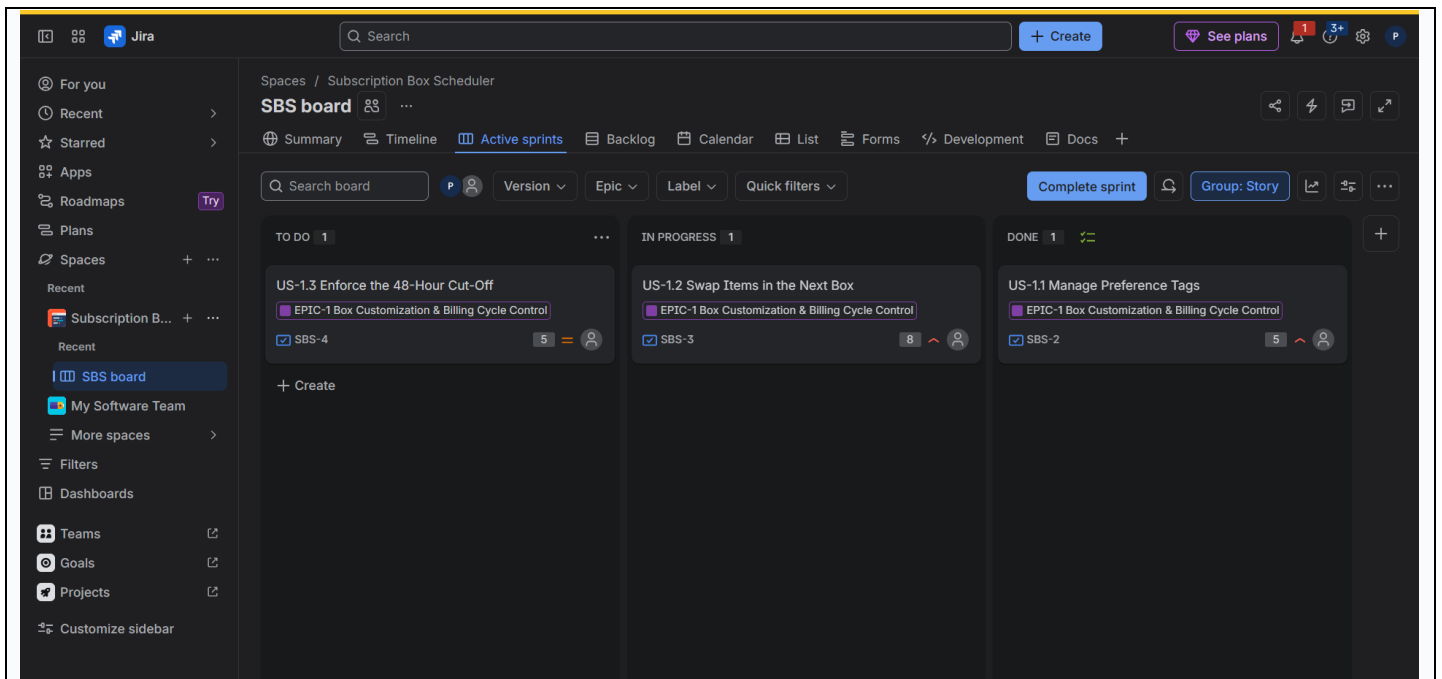

Screenshot 2 — Story point assignments

When to capture: Capture at the same moment as Screenshot 1, but as a different view: click EPIC-1 in the Epic panel so its 34-point total shows, with the per-story point badges down the right.

Screenshot 3 — Sprint board - Active Sprint view

When to capture: Capture MID-SPRINT with the three Sprint 1 cards spread across To Do / In Progress / Done - not all in one column. Clicking Complete sprint empties this board permanently.

Screenshot 4 — Burndown Chart

When to capture: Capture after the sprint's cards are Done. Reports > Burndown Chart, pick the sprint, and set Estimation statistic to STORY POINTS (it defaults to Issue Count). If Reports is missing from the sidebar, add it via More > Customize sidebar.
